## B.2. Your solution in details

**1. Problem definition:** Please explain what problem(s) your solution is seeking to address and how that relates to the migrant inclusion challenge(s) described by EPIM.  
*(Max. 1700 characters, with spaces)*

**2. Description and relevance of the solution:** Please describe the proposed solution and explain how it contributes to one or several of the following drivers of inclusion: i.e. labour market and economic inclusion, social empowerment, literacy and language learning, inter-cultural dialogue and cultural participation or participation in (local) public life, in a sustainable way.  
*(Max. 2000 characters, with spaces)*

**3. Adoption of a whole-of-society approach:**

- Please explain to which extent the solution adopts a **bottom-up approach**, i.e. is developed and driven by local communities (including migrants)?
- Please explain to which extent the solution adopts an **issue-focused approach** and **holds value for society as a whole**?

*(Max. 1700 characters, with spaces)*

**4. Contribution to social cohesion:** Please explain how the solution contributes to build bridges across diverse members of society, generates regular social interactions, direct encounters etc.?  
*(Max. 1700 characters, with spaces)*

**5. Innovativeness of the solution:** What makes your solution innovative (i.e. to which extent does it differ from other initiatives addressing the same issues, how does it contribute to new thinking in the area of migrant inclusion)?  
*(Max. 1500 characters, with spaces)*

**6. Social impact:**

- What has been the impact of the solution to date?
- How do you know such an impact has been achieved? When possible, please share with us a story, an article, a report illustrating such an impact.

*(Max. 1700 characters, with spaces)*

**7. Scalability:**

- Does the solution have the potential to be adapted in other geographical contexts (i.e. the success of the solution is not context-specific)?
- Do you already know stakeholders who may be interested in adapting the solution in their own context? If so, which ones?

*(Max. 1500 characters, with spaces)*

**8. Organisational capacity:**

- What is the **current composition of the team** required to design and implement the solution (e.g. number of staff, volunteers, types of roles etc.)? With EPIM's support, would the team be able to support the social replication process through knowledge, expertise, experience and commitment?
- What is the **budget** required to implement the solution? How is it financially supported?

*(Max. 1200 characters, with spaces)*

C. Additional information (optional)

1. Please use this space to add any **information you deem important** for us to know regarding your organisation or the solution.

2. Please feel free to **share links and/or upload files** that illustrate your solution or document its impact.
